Ad Group Management - Agenda

- ❖ Ad Group Structure and Limits
- ❖ Ad Group Strategies Overview
- ❖ Ad Group Strategies for Search Network
- ❖ Ad Group Strategies for Content Network
- ❖ Ad Group Strategies for Image Ads
- ❖ Recommended PPC Tools

Ad Group Structure and Limits

- ❖ Google AdWords Maximum Limits:
 - 25 Campaigns Per Account
 - **2,000 Ad Groups Per Campaign (Updated)**
 - **2,000 Keywords Per Ad Group**
 - **50 Ad Creatives Per Ad Group**
- ❖ Ad Group Settings:
 - Ad Group Name
 - Targeting: Keywords and/or Placements
 - Ad Copy
 - Headline
 - Description
 - Display & Destination URL
 - Ad Inventory: Text, Image, Video
 - Keyword Budget: Max CPC

Ad Group Strategies - Overview

- ❖ Optimal Ad Group structure should achieve the following goals:
 - Achieve and maintain CTR > 3% in Search Network and Quality Score > 7
 - Effective keyword clustering by maintaining tight Keyword-Ad-Landing page relevancy and consistency
 - Set ad serving to 'rotate'. Split-test two ads and play 'beat the control'
 - Track different channels SEPARATELY
 - Network: Search versus Content
 - Content Targeting: Keyword versus Placement
 - Ad Type: Text versus Image versus Video ads
 - Avoid duplicating keywords in different Ad Groups in the same network
 - Google has a one URL per keyword policy

Ad Group Strategies – Search Network

- ❖ Use all 3 match type options for each keyword wherever possible:
 - Broad
 - Phrase
 - Exact
- ❖ Identify undiscovered performing and negative keywords:
 - Google AdWords Keyword Tool (<http://www.FreeAdWordsTool.com>)
 - AdWords Search Query Report
 - Website Log Files / Google Analytics
 - Extract actual search terms
- ❖ Pay attention to CTR, Quality Score, Average Ad Position, Conversion Rate
- ❖ Start with an Ad Group Max CPC, but need to refine at the keyword level
- ❖ Consider using 'Position Preference' to better manage Ad Position
 - Max CPC must be high enough to qualify for desired Ad Positions

Ad Group Strategies – Content Network

- ❖ Create separate Ad Groups for keyword and placement targeting
- ❖ Use only broad match keywords based on 'theme' concept
 - Limit keywords to 15-20 keywords per Ad Group
- ❖ Use only the most relevant negative keywords, to prevent over-restrictive ad serving
- ❖ Bid lower Max CPC for content network compared with search network – CTR does not affect CPC here
- ❖ Review Placement Performance Report to determine top performing URLs
- ❖ Move top-performing URLs from 'Automatic Placements' to 'Managed Placements' under 'Network' tab in Google AdWords
- ❖ Consider activating demographic bidding feature. Review Demographic Performance Report to determine best converting demographics

Ad Group Strategies – Image Ads

- ❖ Images ads can return a higher ROI than text ads in the content network
- ❖ Create stand-alone Ad Groups for image ad campaigns
- ❖ Can be triggered by Keywords or Placement URLs.
- ❖ Utilize and upload FULL image ad inventory to increase ad exposure
 - 720 x 90, 468 x 60, 120 x 600, 160 x 600, 200 x 200, 250 x 250, 300 x 250, 336 x 280
- ❖ Use Cost-Per-Click rather than CPM pricing for image ads
- ❖ Set a higher CPC when using image ads. They occupy the entire ad block and therefore cost more than text ads.
