Bottom Text: Who Should Attend This Class?

WIA PRO Builder Dashboard

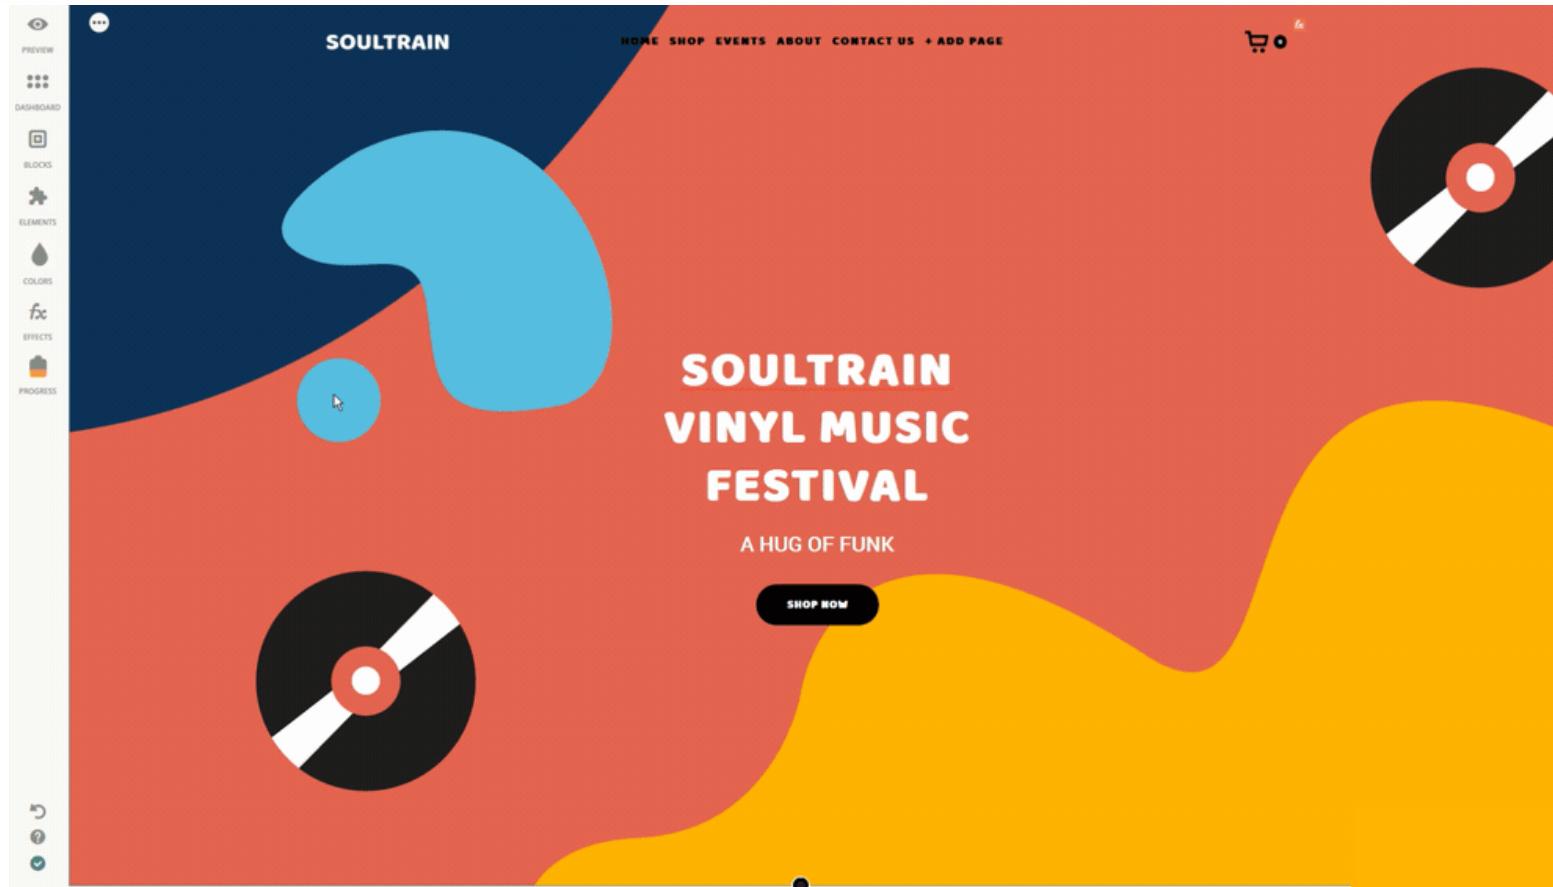

[MY SITES](#) [★ UPGRADE](#)

If you want to make your site more colorful and eye-catching by changing the color of any element, make sure to use the '**Colors**' tool from the **Tools Panel** on the left.

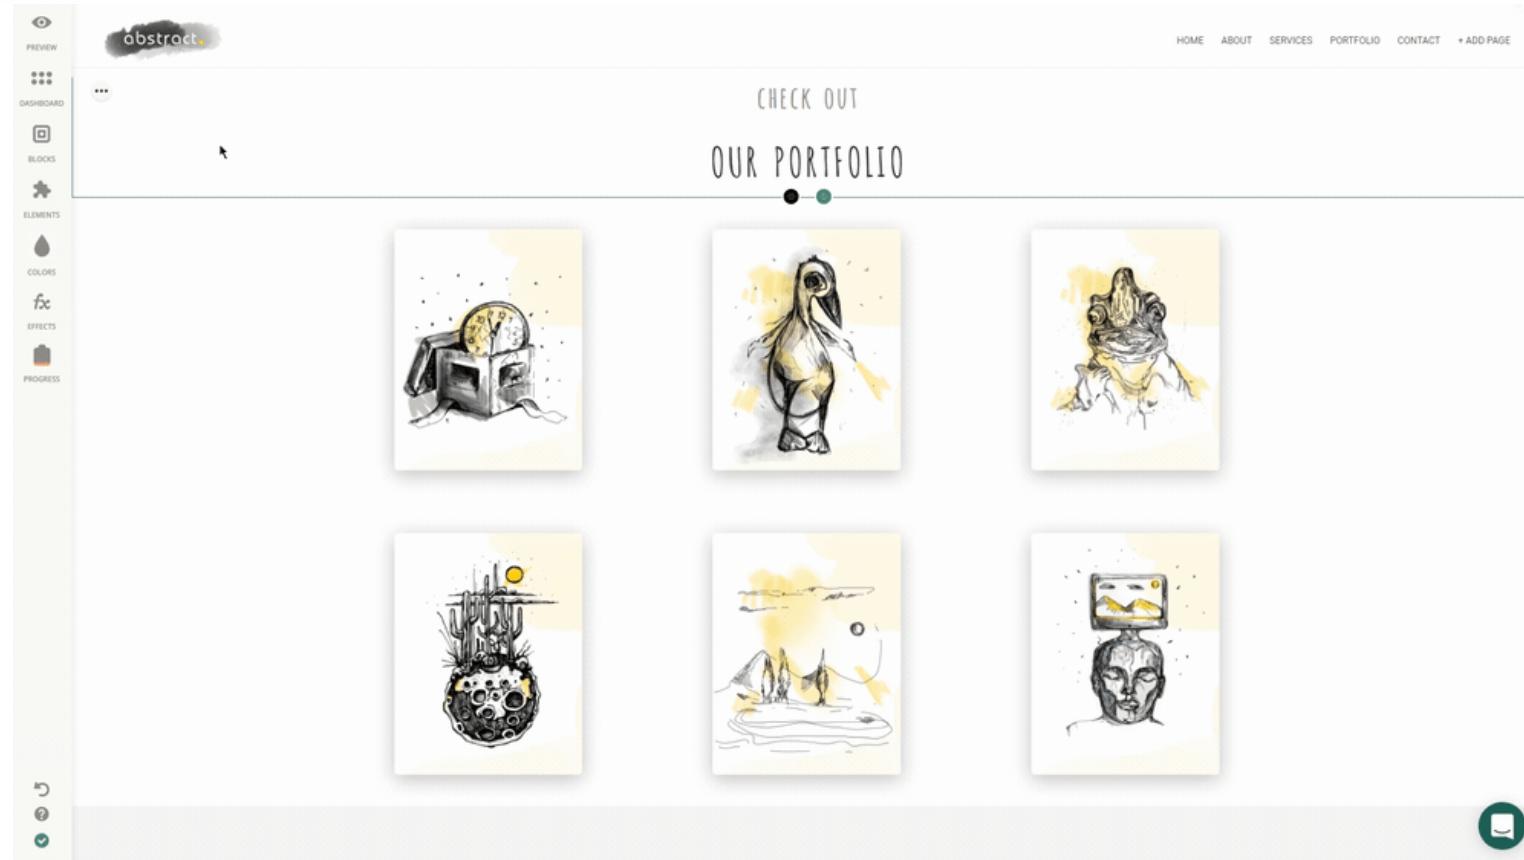

Effects (Fade-In)

Fade In is a cool effect to be used on an element or a block on your homepage, but it can quickly get annoying if you apply it to every page.

Blocks (Select)

To get started, click on the ‘Blocks’ icon and you’ll be offered a name list of all available block types and their examples: from Headers and Footers to Gallery, Testimonial Blocks, etc.

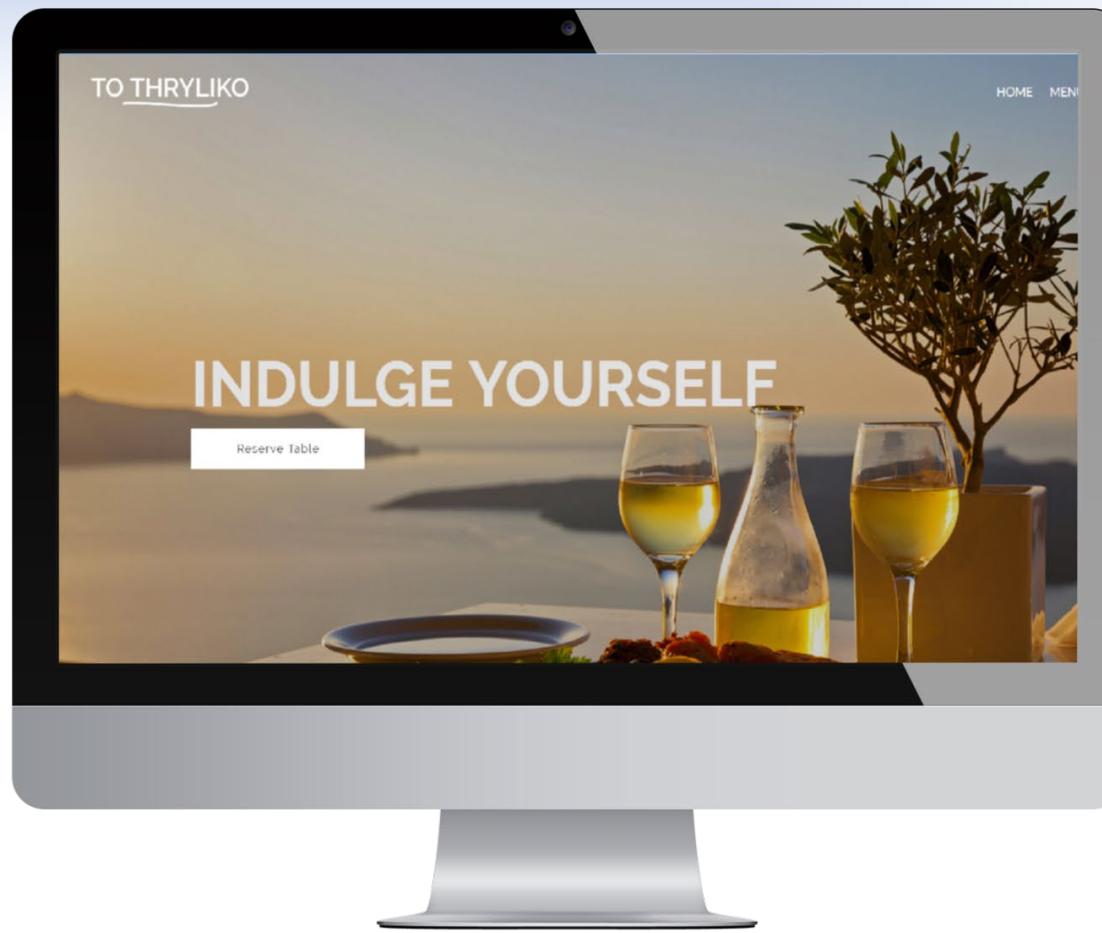

Blocks (Drag & Drop)

To 'Add' the block, just drag and drop it to the desired section on the **Crafting Area**.

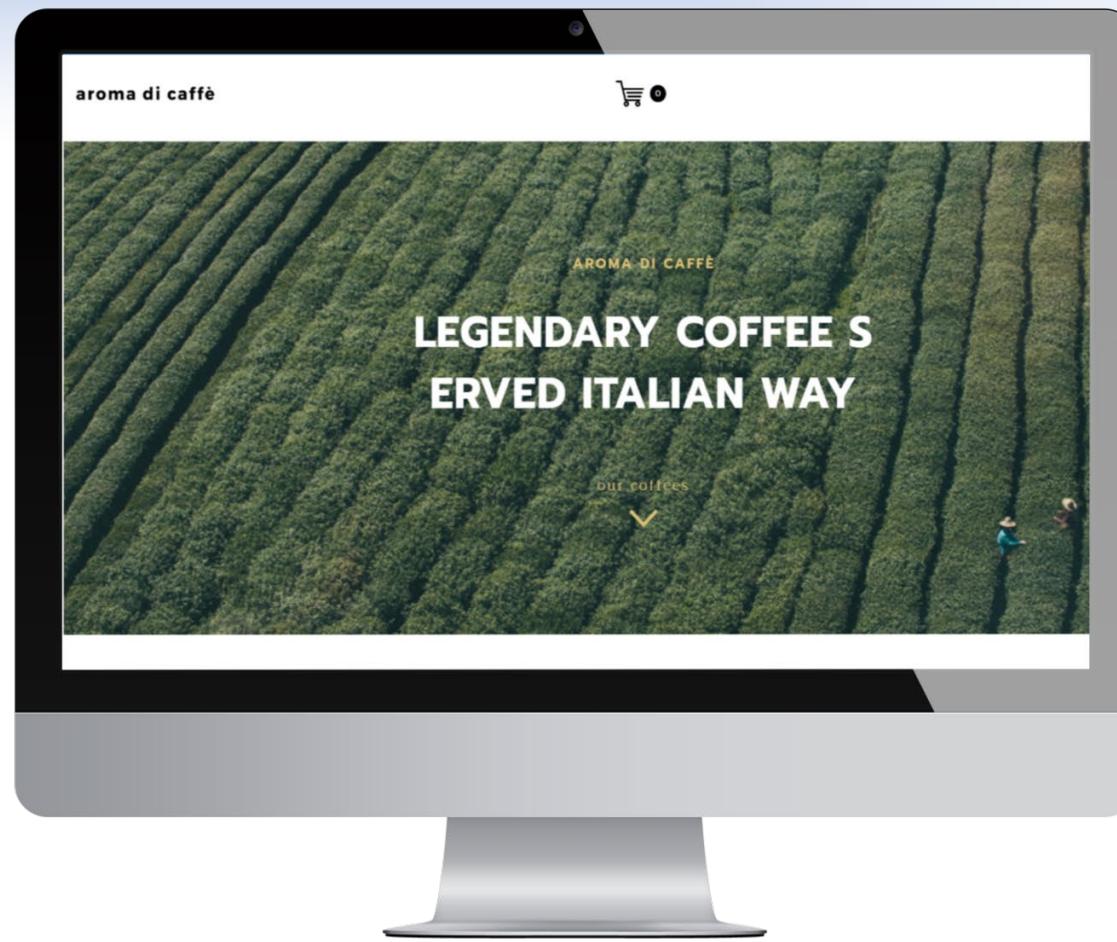

The screenshot shows the Ucraft website builder interface. On the left, there's a sidebar with icons for Preview, Dashboard, Blocks (selected), Elements, Colors, Effects, and Progress. The main area is titled "abstract." and contains three cards with abstract illustrations: a cactus-like plant, a landscape with mountains and a sun, and a portrait of a person with a screen for a head. Below this is a horizontal navigation bar with "HOME", "ABOUT", "SERVICES", "PORTFOLIO", "CONTACT", and "+ ADD PAGE". At the bottom, there's a footer section with "CONTACT US" and "SOCIALS" sections, and a copyright notice: "Copyright © 2017 Ucraft.com".

Earn Up To 50% Commissions (1-Tier) on Sales Of Retail Products, Services & Workshops

In conjunction with the upcoming Black Friday Sale observed globally by thousands of online stores, we've decided to create a **truly affordable and irresistible Black Friday deal for you!**

One of the very first tools all online entrepreneurs need to invest in is a website builder platform & website hosting. Many turn to WordPress because it is open source and therefore free to use. They then purchase a hosting package to self-host their websites. Others turn to online platforms like Wix or Squarespace that charge monthly fees but being a hosted platform, the user does not need to worry about website hosting issues and security updates.

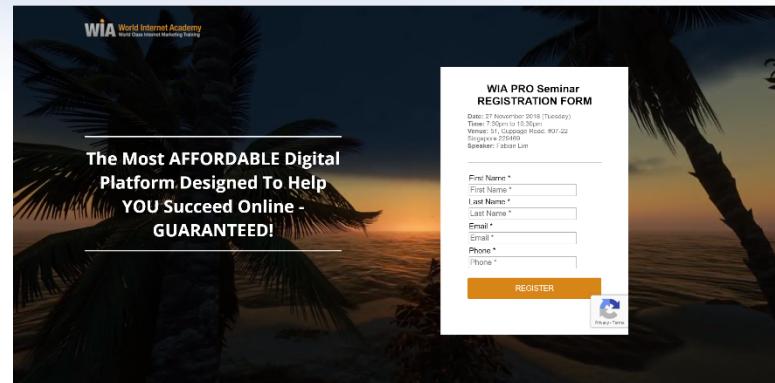

Are you an existing WordPress user?
Or do you plan to learn WordPress to build a website?

We strongly recommend against using WordPress for the following 5 reasons:

- 1) Unnecessarily complicating even for a fairly competent users!
- 2) Time-consuming as you'll need to install a bunch plugins if you require extra functionality like forms, social sharing etc.
- 3) Constant need to update both plugins and theme regularly - failure to do so can result in your WordPress site getting hacked
- 4) Need to re-learn how a theme functions if you switch to a new theme
- 5) Fear of the 'white screen of death' should any plugin be incompatible with newer WordPress versions

One would think that in this modern day and age, there would be a slicker and more powerful website builder that allows you to build a modern-looking and beautiful website easily and quickly than WordPress... And The GOOD NEWS is there is such a platform!

Introducing The WIA PRO Builder LIFETIME Deal!
Here's Exactly What's Included In This Package...

FINALLY - Everything You Need To Succeed Online Under One *Truly Affordable* Digital Platform

World Internet Academy PRO is a truly affordable community-based all-in-one online platform that provides you with all the tools, training and resources needed to become successful online - for less than USD 1.35/day!

Here's What You'll Get From A WIA PRO Monthly Membership:

Discover PROVEN WAYS To Acquire The Skills Necessary To Become A Successful Digital Marketing Entrepreneur!

Learn PROVEN WAYS To Become A Successful Digital Entrepreneur

We are excited to share with you proven ways to acquire genuine digital marketing skills so you can become a successful entrepreneur, even if you know nothing about computers!

Interested to find out more?

Then read ...

By the way, this is not a 'get rich quick' scheme, neither is this MLM...

You see, more and more people want to start an online business, but most do not succeed.

Why?

Because they don't understand how to drive targeted and qualified traffic to their website. Without qualified visitors visiting their website, they won't be able to generate any leads or sales.

So the first step to becoming a successful digital entrepreneur is by learning how to drive targeted, wallet-ready traffic.

So what traffic skills should you acquire?

The truth is, we are living in 'multi-channel' traffic era, meaning our potential customers are using multi-devices to do their online research before they make a buying decision. For example, they will likely use Google to research products and services online, then use Facebook to connect with friends for recommendations. They may eventually head back to Google to search for a website to make their purchase.

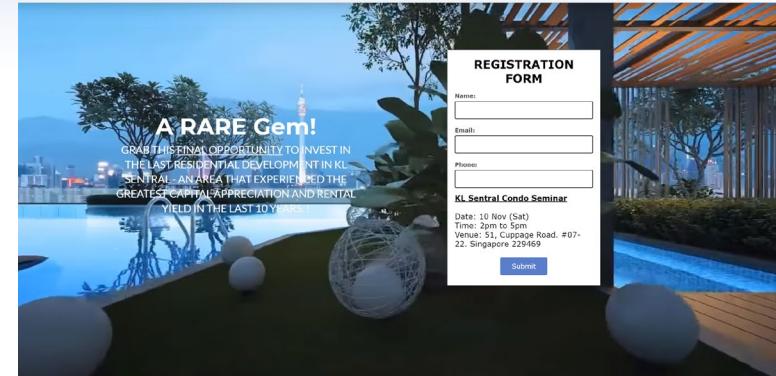

So to be successful in digital marketing, you really need to understand 'multi-channel' digital marketing.

But what if you don't have any knowledge in digital marketing?

Here's the good news... My team and I will train you from scratch!

Here are the 'multi-channel' digital marketing skills we'll train you to master:

Digital Marketing Training (RM 500 Commissions)
